# From Concept to Customer: Elevating ARAS Innovator PLM with SALESIGHT PLM for Seamless Sales and Marketing Integration

Pawel Wojcik

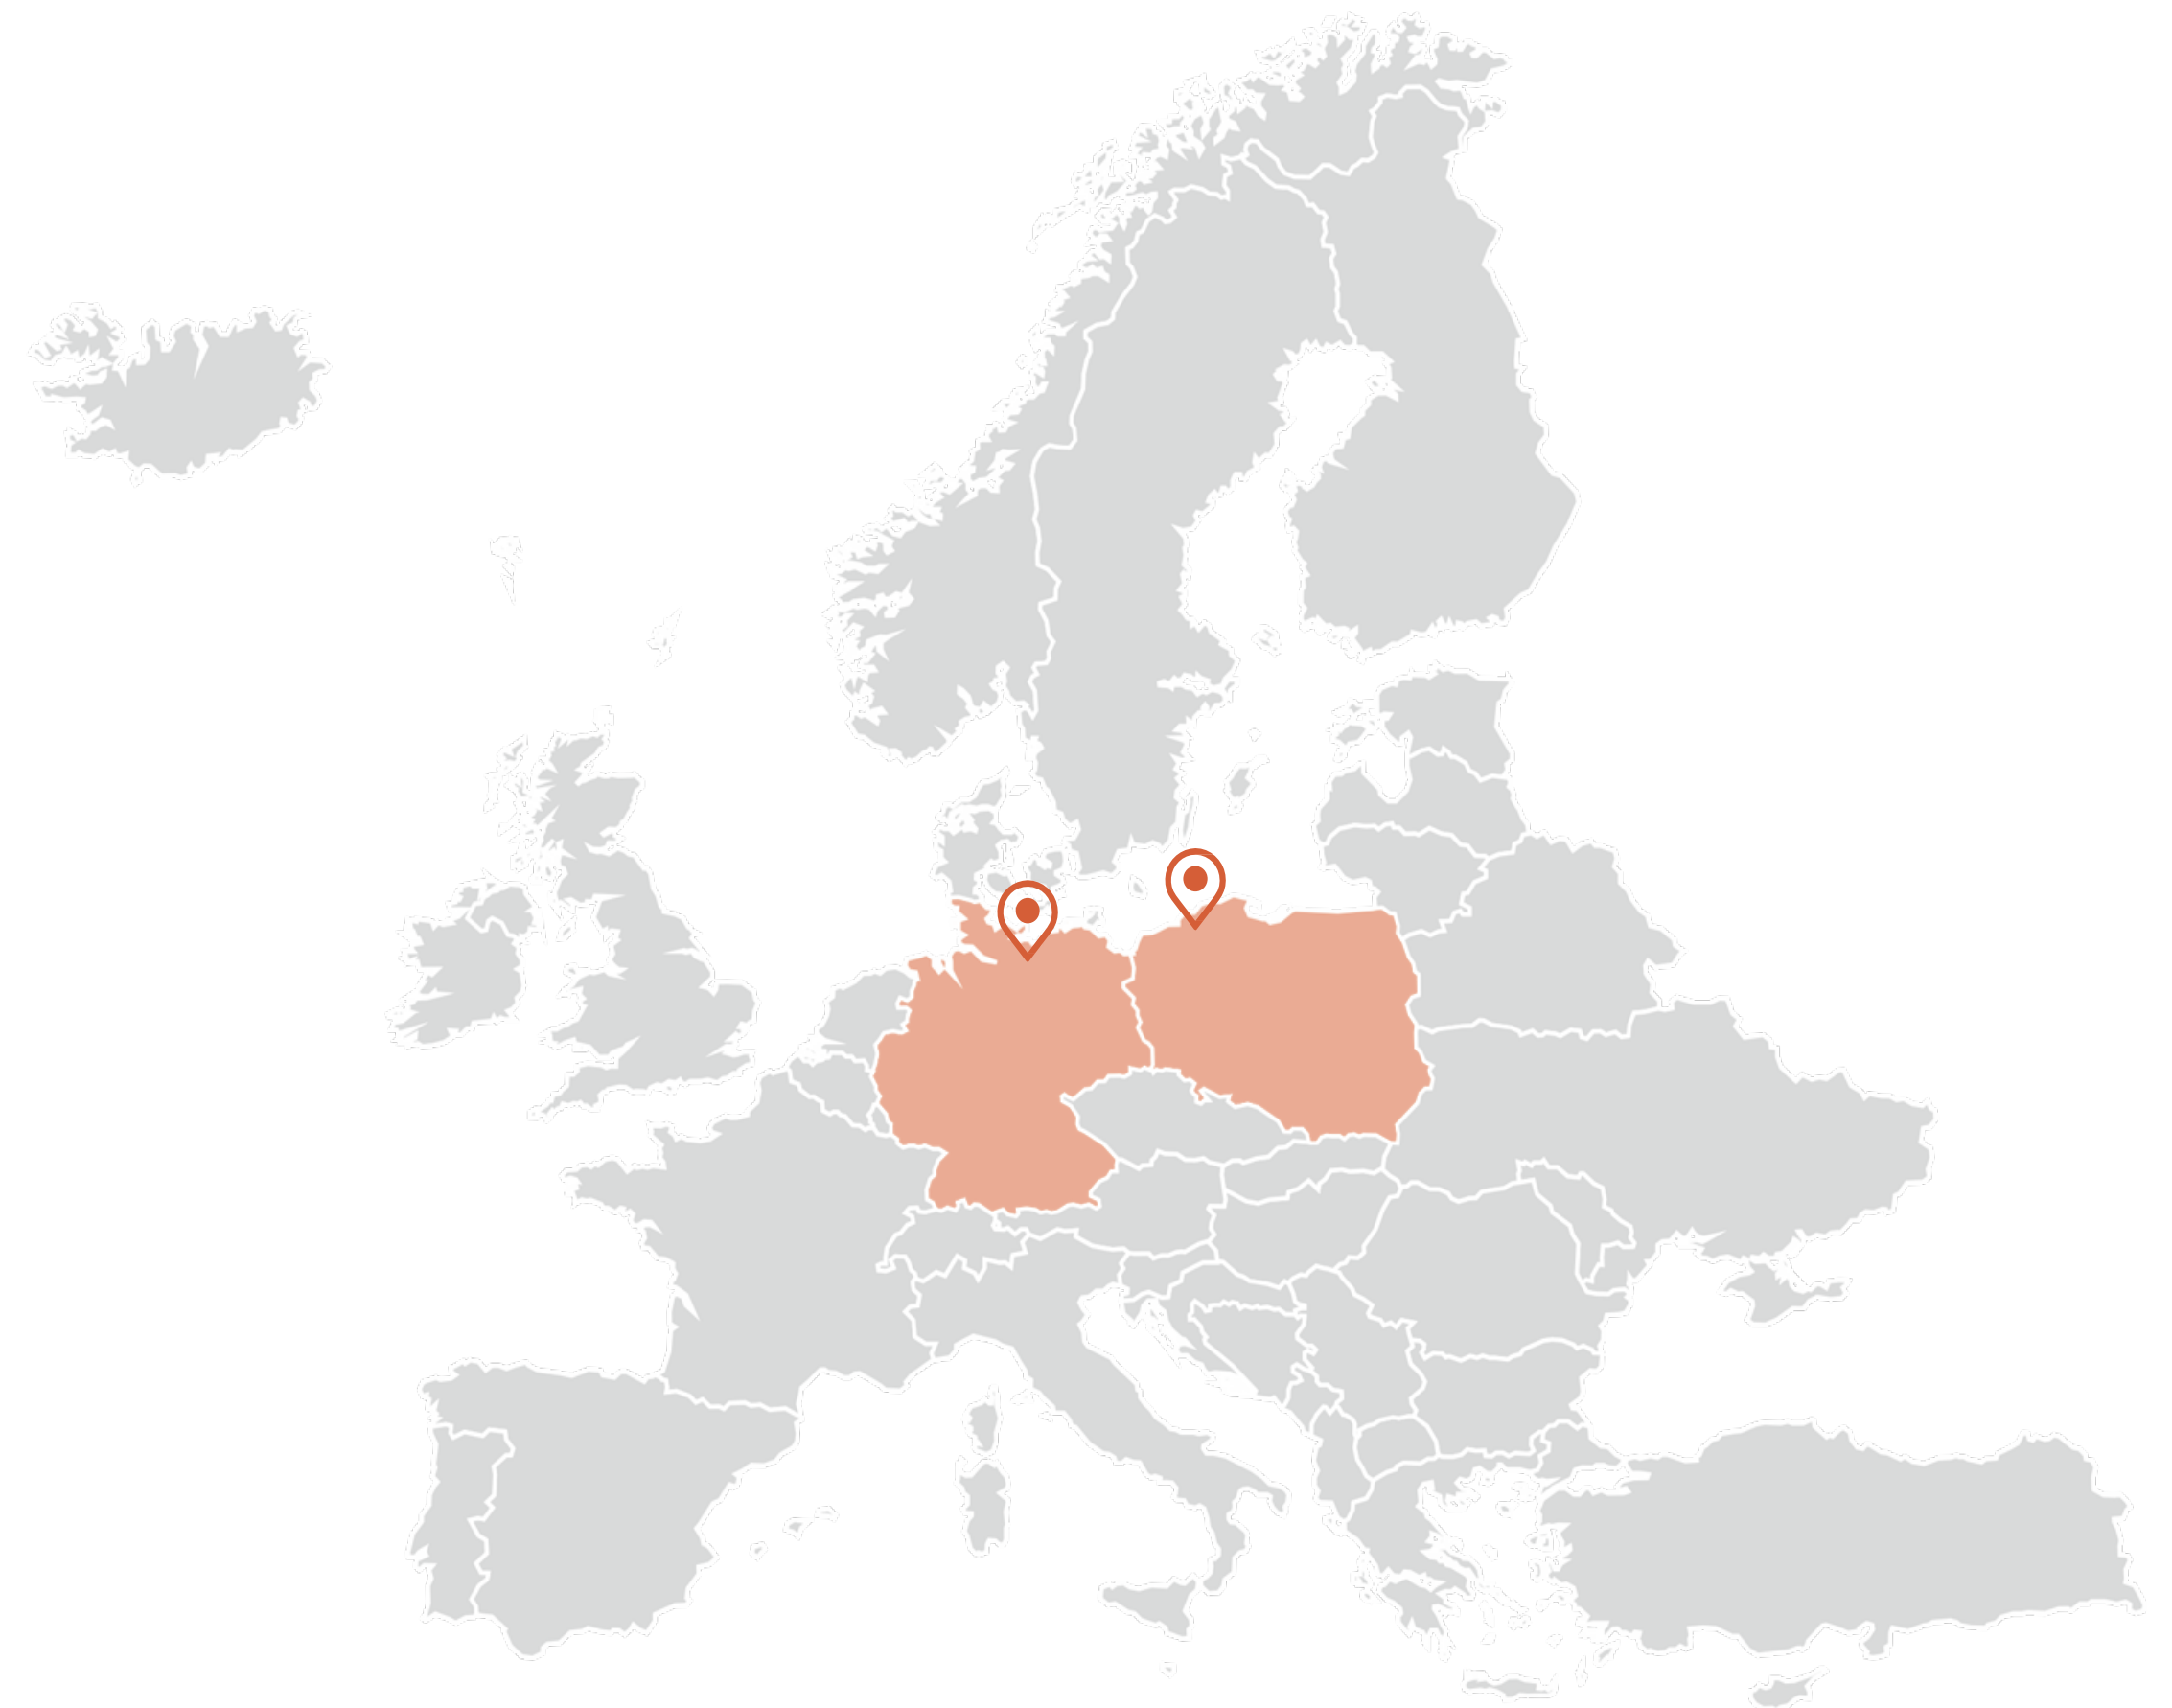

Wednesday, 6. March 2024

## mediatec.net Group

- International company
- Locations in Germany and Poland
- Software development for all industries
- Focus on Medical and Pharma industries

## Why did we develop this module?

- **CHALLENGE FOR OUR CUSTOMERS IN MEDICAL DEVICE SECTOR:** Efficient, precise data provision and automation in marketing and sales, critically important in the highly regulated medical device environment.
- **WHY ARAS PLM?** Offers an extensive data foundation key to automating and efficiently distributing information, meeting high industry standards.
- **OUR SOLUTION:** SALESIGHT PLM – enhances ARAS PLM with integration tailored to the needs of the medical device sector, yet universally applicable across all industries. Enables seamless connection between product development, marketing, and sales.
- **GOAL AND IMPACT:** Boosts efficiency across the entire value chain, from idea to end-customer. Supports data-driven decisions, accelerates market launch, and aids in meeting quality and safety standards, enhancing competitiveness – in the medical device sector and far beyond.

## Agenda Overview: Navigating Today's Topics

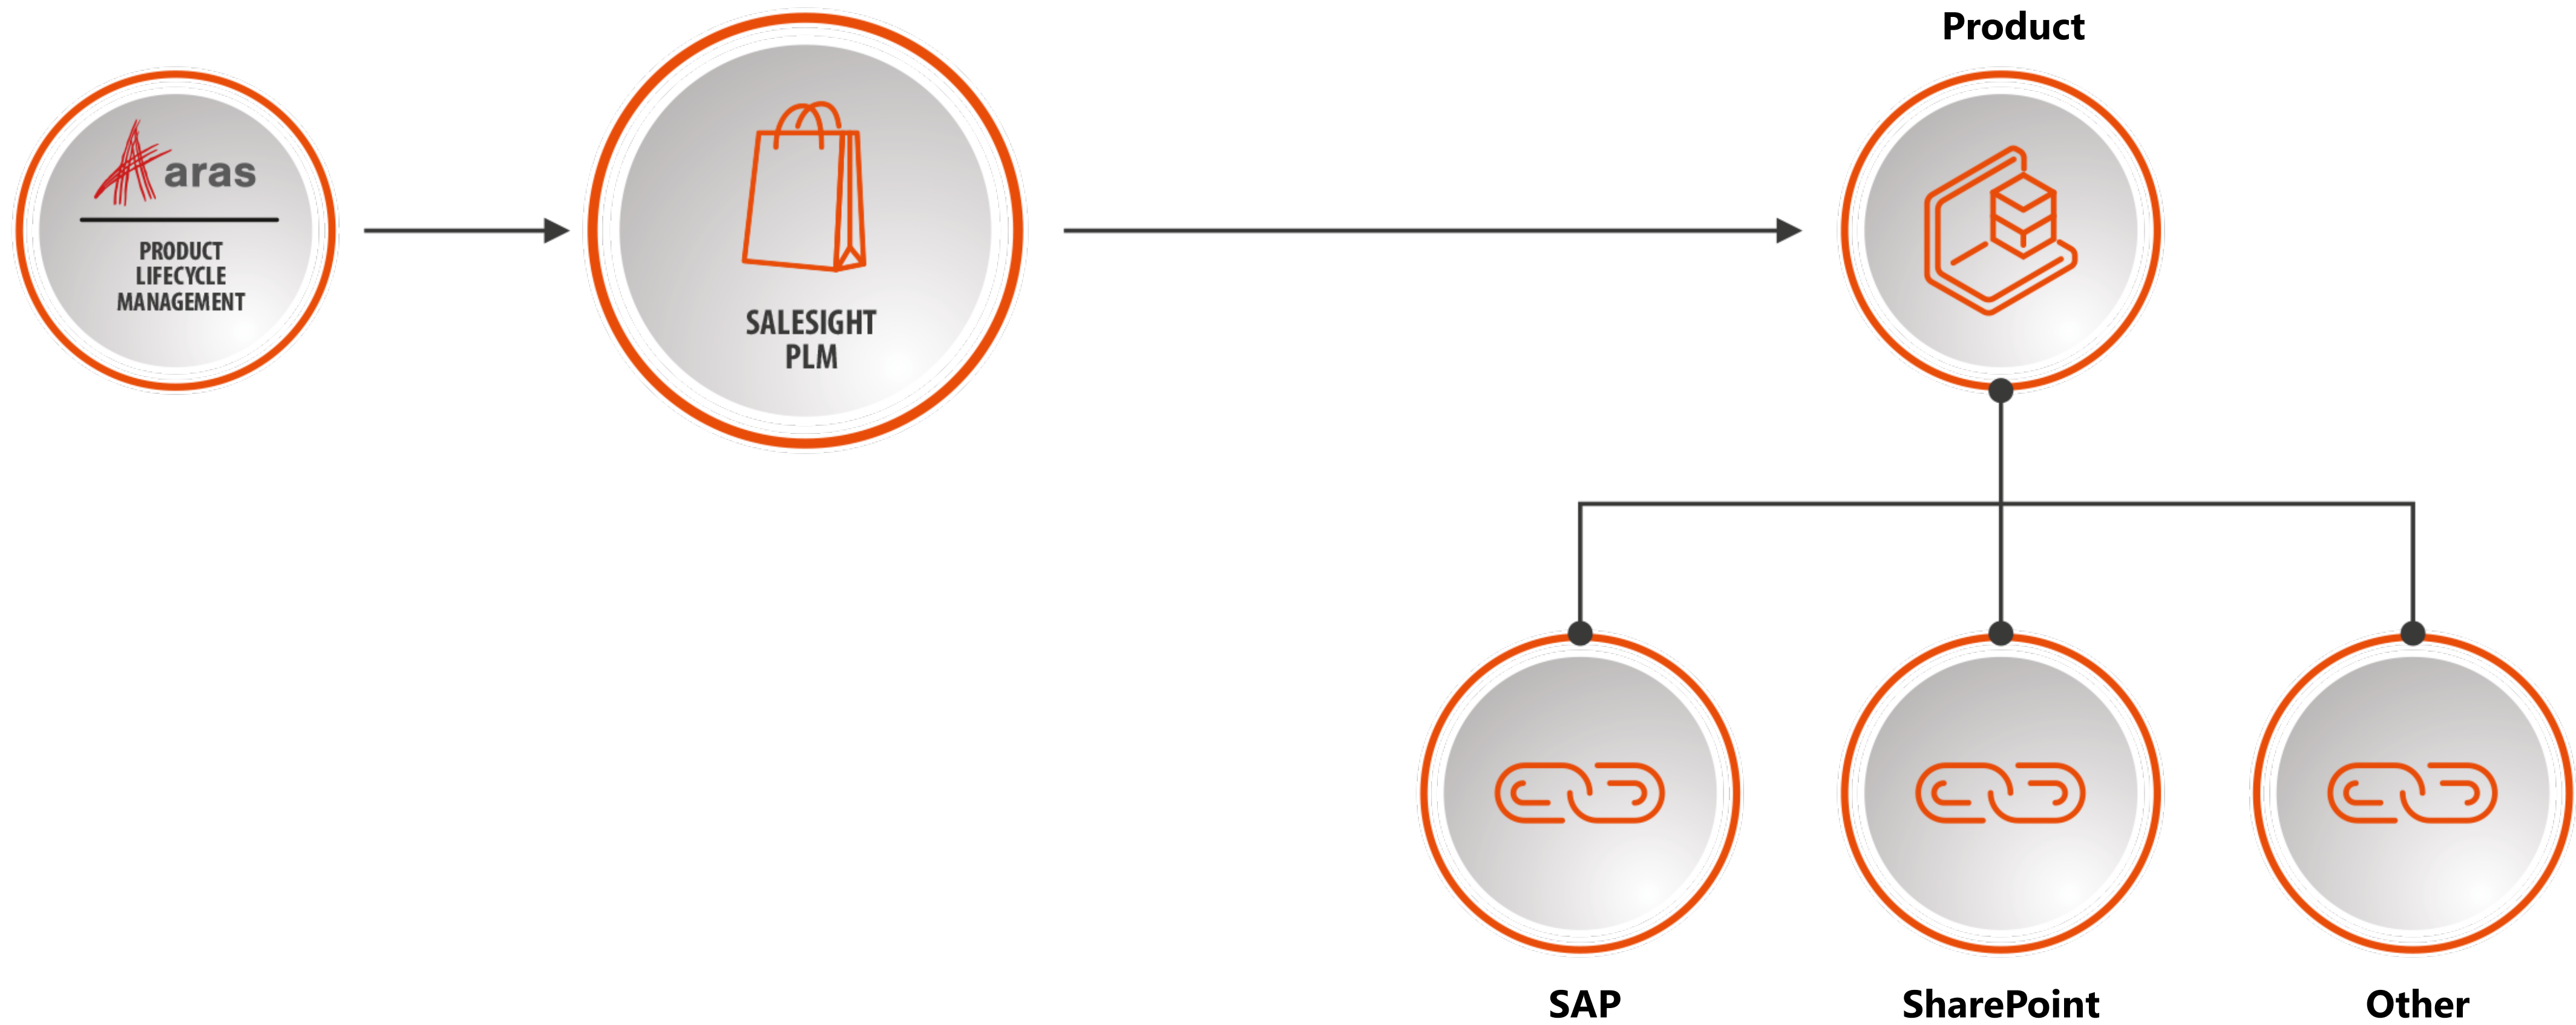

- Creating a new Sales/Marketing Item with SALESIGHT PLM
- Editing Sales/Marketing Data in Action
- Additional Features/Tools for Content Maintenance Support
- Automating Sales and Marketing Data Publication

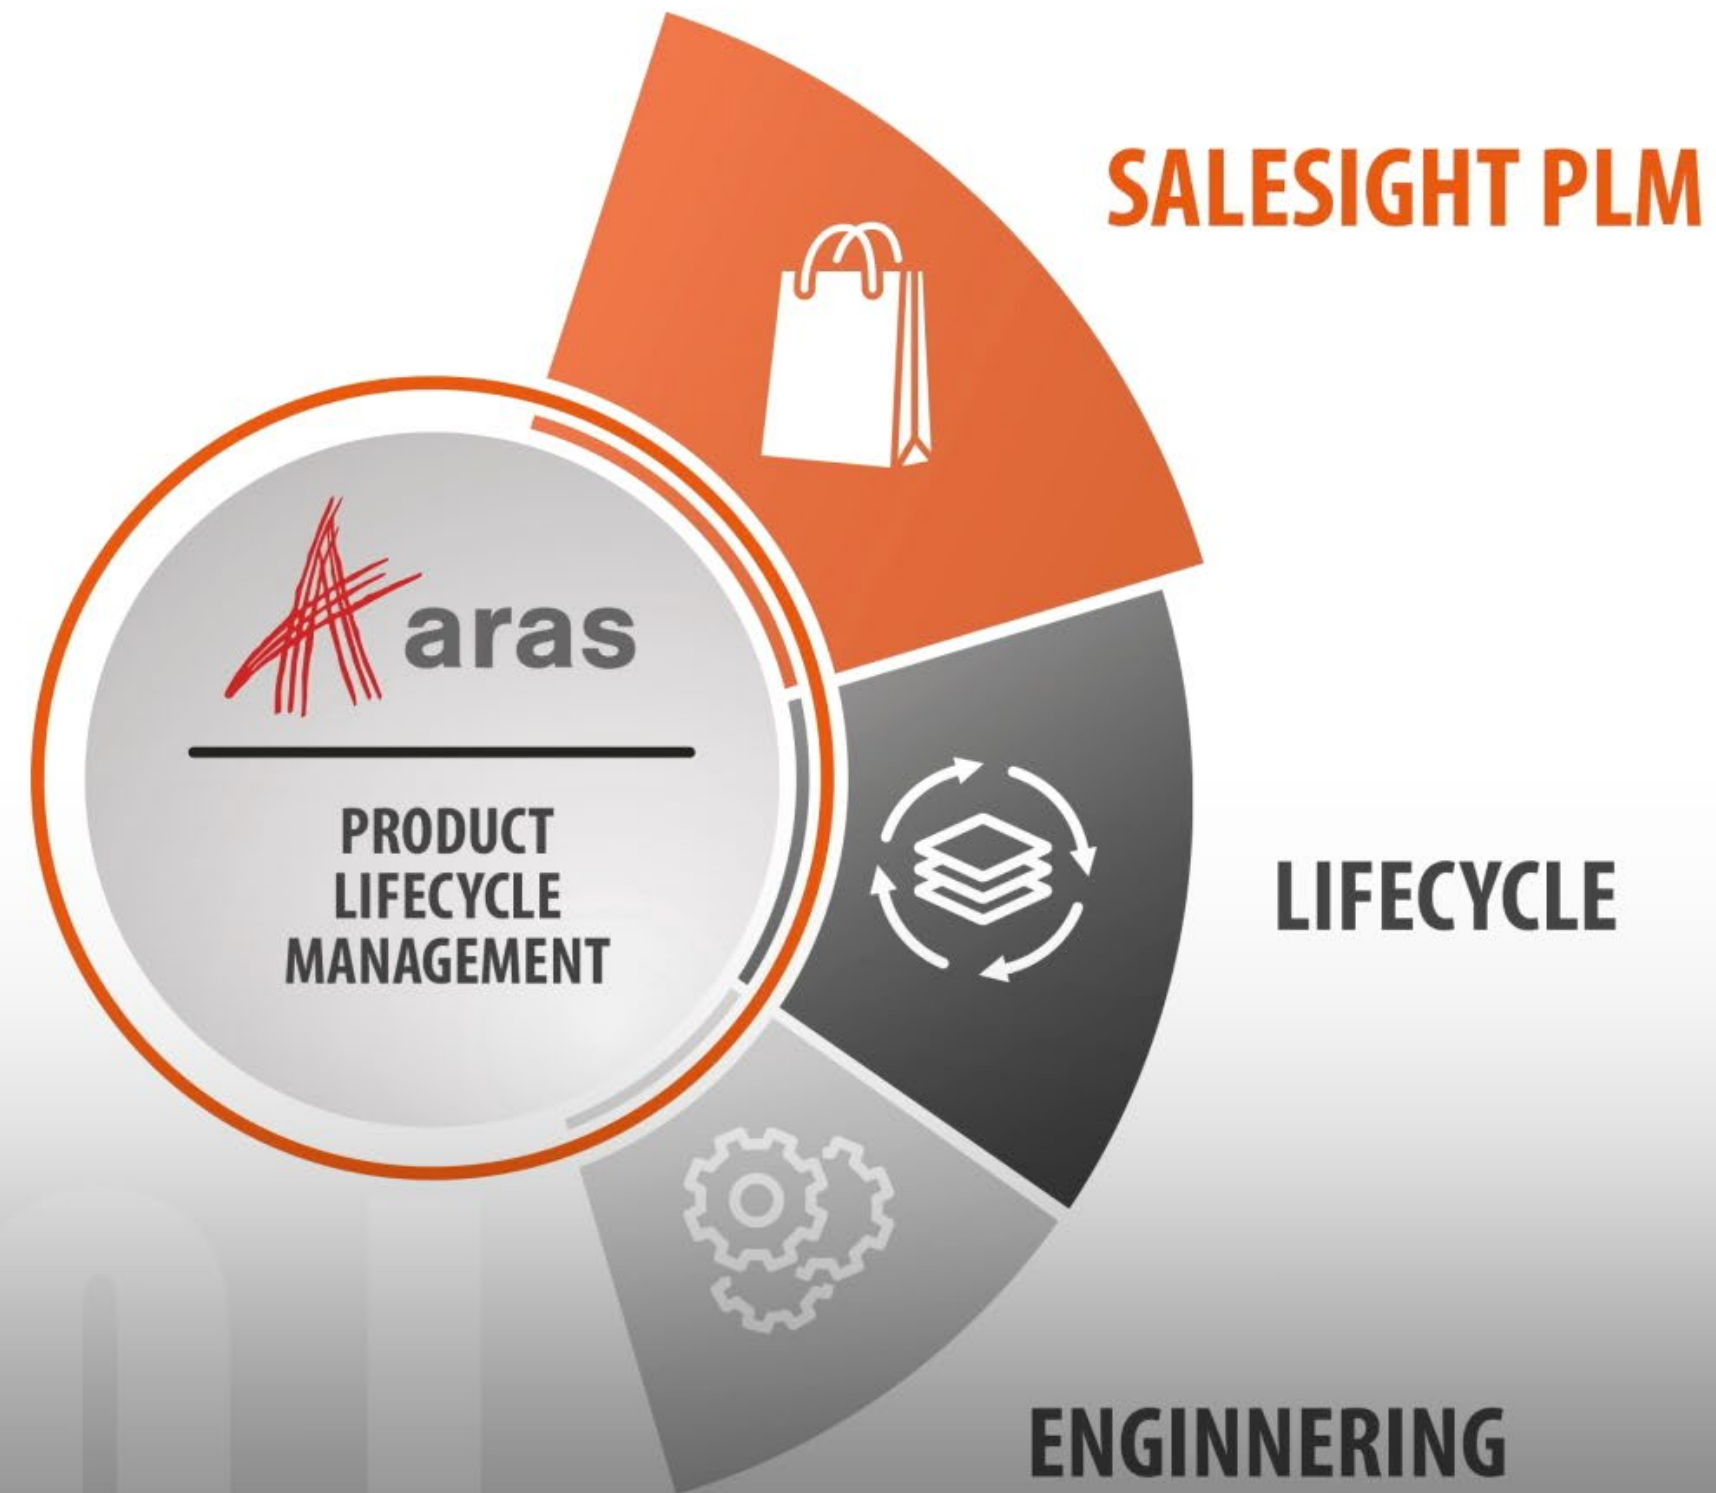

## Advantages of SALESIGHT PLM

- **CENTRAL DATA STORAGE:** All relevant product information in one place - from conception to sales..
- **OPTIMIZED DECISION-MAKING:** Integrated sales and marketing data enables teams to design and adapt products based on actual market requirements.
- **TIME SAVING:** Elimination of manual data transfer processes between departments and systems, freeing up time for strategic tasks.
- **BETTER MARKET ADAPTATION:** By linking PLM and sales data, products can be adapted to market changes more quickly.
- **INCREASED PRODUCTIVITY:** Teams can focus on product innovation instead of spending time searching and consolidating data.
